

Agentic Investment Bank Canvas

A business-model-canvas style tool for designing a human-led, agent-executed banking operating model

From AI tools to an agentic operating model

Connect proprietary context, specialized agents, human judgment, governance, and measurable client value

1 Proprietary Context

What does the bank know that others do not?

Client history, sector theses, deal precedents, buyer behavior, valuation history, risk learnings

2 Agentic Capabilities

What specialized agents are required?

Market, company, valuation, origination, execution, compliance, and knowledge agents

3 Client Value

What client advantage are we creating?

Faster advice, better timing, sharper options, stronger execution, earlier risk detection

4 Human Judgment

Where must bankers make the call?

Strategic advice, outreach decisions, board recommendations, negotiation strategy, final approvals

5 Client Experience

How does advisory improve?

Always-on intelligence, more personalized advice, faster responses, fewer execution gaps

Human-led, agent-executed, governance-by-design

The operating model shifts from isolated AI pilots to coordinated digital deal teams

6 Workflow Orchestration

How do agents and bankers coordinate work?

Triggers, handoffs, review loops, escalation paths, approval gates

7 Governance & Controls

How is the system safe and auditable?

Permissions, MNPI boundaries, conflicts checks, audit logs, model validation

8 Technology Foundation

What infrastructure enables scale?

Secure data layer, APIs, CRM integration, document intelligence, workflow tools

9 Talent & Adoption

What new capabilities do bankers need?

AI supervision, prompt literacy, output validation, data interpretation, agent management

10 Value Metrics

How do we measure business impact?

Time saved, error reduction, response speed, mandate conversion, client satisfaction
